

Hruthik R Salian

B.Tech Computer Science student

✉ hruthikrsalian224@gmail.com ☎ +918317348295 📍 Mangalore, India 🌐 Hruthik R Salian

PROFILE

Computer Science and Engineering student specializing in full-stack development and data analysis. Skilled in building web applications using React.js, Spring Boot, and MySQL. Strong understanding of algorithms, database design, and clean code practices. Targeting software development roles where I can apply scalable engineering solutions.

EDUCATION

B.Tech in Computer Science and Engineering, 2022 – Present
NMAM Institute of Technology, Nitte
CGPA: 7.61

12th Grade, Alvas PUC, Moodabidre 2020 – 2022

10th Grade, St. Dominic School, Polali, Bantwal, Mangalore 2020

TECHNICAL SKILLS

Programming Languages

Python, Java, C, R

Frontend Development

HTML5, CSS3, JavaScript, React.js

Backend Development

Spring Boot, REST APIs

Database & Data Handling

MySQL, SQL

Tools & Platforms

Git, GitHub, VS Code, Jupyter Notebook

PROJECTS & EXPERIENCE

Online Job Portal | React.js, Spring Boot, MySQL, Spring Security

- Developed a full-stack recruitment platform using React.js (frontend) and Spring Boot (backend), deployed for over 200 mock users.
- Integrated MySQL with optimized queries, improving data retrieval speed by 30% and reducing average load time from 1.4s to 1.0s.
- Implemented Spring Security to ensure 100% authenticated access and safeguard user sessions.
- Designed a real-time job search and filtering feature, boosting user interaction by an estimated 40%.
- Completed the project in under 12 weeks as part of a 3-member team following Agile methodology.

Data Analysis of expense sheet

- Analyzed 12 months (~3,000 records) of financial data using R, ggplot2, and dplyr.
- Cleaned and merged multiple datasets, ensuring 100% data accuracy and removing inconsistencies.
- Created 4+ interactive visualizations (bar and line charts) that uncovered 25% spending fluctuations across months.
- Delivered analytical reports that improved budgeting predictions by 15% based on data-driven insights.

Courses

RELEVANT COURSEWORK

- **Data Structures & Algorithms** — Implemented sorting/searching algorithms in C++/Python.
- **Database Management Systems** — Created normalized schemas and optimized SQL queries.
- **Web Technologies** — Studied HTTP, client-server architecture, and responsive UI development.
- **Object-Oriented Programming** — Applied inheritance, abstraction, and polymorphism in Java.
- **Software Engineering** — Designed system use cases and documentation using SDLC.
- **Intro to Machine Learning** — Trained simple regression/classification models.

Certificates

Full Stack Web Development

- Constructed a simple CRUD-based web application, demonstrating competency in frontend-backend integration and API consumption.
- Acquired hands-on experience in fundamental web technologies, including HTML, CSS, JavaScript, and basic backend concepts.
- Applied design principles focused on creating responsive and user-friendly interfaces.

Python Data Structures & Algorithms + LEETCODE Exercises

- Leveraged knowledge of Python data structures to solve 30+ algorithmic problems on LeetCode.
- Mastered the implementation of common data structure operations and improved proficiency in Python for competitive coding.
- Acquired a solid understanding of data structures including lists, sets, stacks, queues, and trees.
