

NIHAAR RAI V

📍 575003 Mangalore, India 📞 +91 8073488624 ✉ rainihaar@gmail.com

Profile

Enthusiastic and adaptable developer with hands-on experience in software development, including API design and backend systems. Passionate about AI and large language models, with project experience in building intelligent tools. Currently exploring the field of cybersecurity and aiming to transition into roles that combine secure systems with intelligent technologies. Eager to contribute to dynamic teams while continually expanding technical depth across AI and cybersecurity domains.

Experience

1. Siemens Technology and Services Private Limited June 2025 – Present

- **Role** -Technical Intern
- **Internal Document Chatbot Tool**

Developed an AI-powered internal chatbot that answers user queries based on hundreds to thousands of classified documents. To handle large documents efficiently, the system parses and breaks them into manageable semantic chunks for accurate retrieval. It delivers context-aware responses with source references and document links. Admins can upload new documents, and if a similar document exists, the system automatically replaces the outdated version with the updated one to maintain relevance and consistency.

2. Tetherfi

June 2024– July 2024

- **Role** - Software Development Intern
- **Document Data Masking API**

Built an API using python as an internal enterprise tool for a company. The API processes documents and files to mask sensitive data based on user-defined parameters. Utilized Postman for testing and validating API endpoints, ensuring reliability and performance.

Projects

1. Data Analysis of Expense Sheet

- Utilized R Studio to analyze a comprehensive expense sheet, focusing on the complete study of expense-related data. Leveraged expense data to generate detailed summaries, including average spending per month and week.

2. Expense Splitter

- Developed an expense-splitter application using HTML, CSS, JavaScript, React and MySQL for the backend.
- The application helps with splitting expenses among friends and family, ensuring an easy and transparent process for dividing shared costs.

Education

Bachelor of Engineering - BTech Computer Science,
NMAM Institute of Technology
July 2022 – present

12th, Expert PU College
Jun 2020 – Mar 2022

10th, Lourdes Central School
2020

Skills

1. Languages

Python, C, R, SQL, C++

2. Soft Skills

Perseverance, Problem-solving, Teamwork, Communication, Confidence

Certifications

1. Machine learning specialization by Stanford and DeepLearning.ai (Coursera)
